DRIES 70

adiate^K

Powerful and robust.

Aries 70 is the
first walk-behind
floor-cleaning machine
designed by Adiatek.

Mounts 24 V batteries with 110 Ah capacity, guarantees high autonomy of use.

Dual-wing electric filter shaker

Double collection tray with ergonomic extraction

Cylindrical brush size 700x240 mm plus Ø 370 mm lateral brush

Highly robust steel frame, which makes the machine suitable also for environments that produce heavy work loads.

Double collection tray

Two front trays facilitate emptying operations by the operator: the two trays have a low weight with a full load, an important factor when having to clean outdoor yards or environments with sand and other high-density materials. The trays are also visible with a simple locking and extraction system that does not require lifting or removal of any parts for unloading operations.

Control panel optimised for an easy user experience

The broad dashboard has all the machine's controls indicated with symbols that are easy and intuitive to understand and that allow the operator to easily approach the job.

High-efficiency filter shaker

The machine is equipped with a dual-wing electric filter shaker that allows for spreading the impulse on a broad surface for effective removal of dust from the panel filter.

TECHNICAL DATA

Central brush cleaning path:	700 mm
Side brush cleaning path:	900 mm
Number of collection trays:	2
Theoretical collection tray volume:	25 l
Real collection tray volume:	10 l
Theoretical total collection volume:	50 l
Real total collection volume:	20 l
Emptying system:	Manual
Traction motor:	95 W
Brush gearmotor:	75 W
Brush motor revolutions:	220 rpm
Suction motor:	75 W
Maximum theoretical productivity:	3.150 m ² /h
Type of filter:	Paper filter
Filtering surface of filter:	2.5 m ²
Maximum speed:	3.5 km/h
Maximum superable gradient:	2%
No-load machine weight:	105 kg
Width:	914 mm
Length:	1.390 mm
Height (at the handlebars):	970 mm
Working voltage:	24 V
Total battery capacity:	110 Ah
